

The following message is to inform San Diego based Systems Center San Diego employees of the work schedule for Thursday 13 September.

We are in the process of returning to normal operations in San Diego, although there will still be some restrictions.

All SSC-SD employees at all San Diego locations that have previously been designated as "Minimum Essential" will be expected to report to work on Thursday. Parking will be restricted at all locations, so carpooling is strongly encouraged.

All other Point Loma based SSC-SD employees will return to a duty status 13 September, but are not to return to their normal workplace until contacting their Supervisor, Division or Department Office. In some cases, the supervisors may work out an alternate work location or telecommuting during this emergency.

Only previously designated Minimum Essential Old Town based SSC-SD employees will report to work unless specifically informed otherwise by their supervisors.

Parking and access will continue to be limited. The following Gate Status is provided for your information:

- Electron Drive Gate - open to vehicles

- Gate 2 - open to vehicles

- C-60 Gate - open to vehicles

- Woodward Road Gate - open to vehicles

- Bayside Gate - walk-in only

- Old Town Gate - walk-in and handicapped access only
